

Category style

You may like the Category style if this sounds like you....

"I want an easy way to verify my account activity based on the different ways I choose to bank – like through Online Banking, ATMs or Check Card Purchases. I like that transactions are grouped together for easy recall and reference."

The Category style account statement:

- Groups account activity in categories based on where/how your transactions were performed
- Only those categories applicable for your activity will be displayed

Every statement style includes...

- An Account Summary that provides an easy-to-read overview of the account
- An Account Activity section with detailed transaction history
- Interest Rate, APY and Tax Information sections for interest-bearing accounts
- A Fee Summary, when applicable, to help reconcile fees, refunds, and Banking Package rebates

Account Activity Sample
